

Ophthalmology Written Booklet — Clinoma Written

Essay Booklet – Written Questions (أسئلة مقالية)

Student Practice Copy (نسخة الطالب)

Total Chapters: 6 | Clinoma written

CURRICULUM

Ophthalmology Written

TOTAL CHAPTERS

6 Chapters

ACTIVE COURSE

رمد نظري (Written)

Chapter 1: الجفون (Eyelid)

Q 1

DEFINITION

Define blepharitis and enumerate its types.

Q 2

DEFINITION

Define Blepharoptosis?

Q 3

ENUMERATE

Enumerate causes of acquired ptosis.

Q 4

SURGICAL PRINCIPLE

Give the surgical principle and choice of operation for ptosis correction based on levator function.

Q 5

SURGICAL PRINCIPLE

What are the contraindications to ptosis surgery?

Q 6

DEFINITION

Define ectropion and name its types.

Q 7

SURGICAL PRINCIPLE

Give the surgical principle of correction for cicatricial ectropion.

Q 8**SCENARIO**

A 65-year-old man presents with eversion of his left lower eyelid, epiphora, and exposure of the tarsal conjunctiva. (a) What is your diagnosis, and what are its degrees of severity? (b) Name the surgical principle for treating the most common type of this condition.

Q 9**DEFINITION**

Define entropion and mention its etiological types.

Q 10**DEFINITION**

Define Spastic entropion?

Q 11**ENUMERATE**

Enumerate the lines of treatment for spastic entropion.

Q 12**DEFINITION**

Define lagophthalmos and enumerate its local causes.

Q 13

ENUMERATE

Enumerate complications of lagophthalmos.

Q 14

DEFINITION

Define trichiasis, enumerate its causes, and differentiate it from distichiasis.

Q 15

DEFINITION

Define Hordeolum externum (Stye)?

Chapter 2: القرنية (Cornea)

Q 1

DEFINITION

Define keratitis and enumerate its main types.

Q 2**COMPARISON****Compare between a hypopyon ulcer and a dendritic ulcer.**

Q 3**SCENARIO**

A 30-year-old contact lens wearer presents with a painful red eye, photophobia, and a corneal ulcer with a grey, dry, fluffy surface and feathery margins. (a) What is the most likely diagnosis and causative organism? (b) How do you confirm the diagnosis? (c) Enumerate the lines of treatment.

Q 4**ENUMERATE****Enumerate causes of corneal perforation.**

Q 5**SURGICAL PRINCIPLE****Give the surgical principle of management for corneal perforation.**

Q 6

SURGICAL PRINCIPLE

Explain the surgical principle of treating a corneal fistula and mention the options if it fails.

Q 7

ENUMERATE

Enumerate the complications of a non-perforated corneal ulcer.

Q 8

DEFINITION

Define keratoconus and name its signs and lines of management.

Q 9

DEFINITION

Define keratoplasty and enumerate its types and indications.

Q 10

ENUMERATE

Enumerate the layers of the Cornea from anterior to posterior.

Chapter 3: الشبكية (Retina)

Q 1

DEFINITION

Define retinal detachment and enumerate its types.

Q 2

DEFINITION

Define rhegmatogenous retinal detachment and enumerate its risk factors.

Q 3

SURGICAL PRINCIPLE

Give the surgical principle of scleral buckling for rhegmatogenous retinal detachment.

Q 4

ENUMERATE

Enumerate signs of proliferative diabetic retinopathy.

Q 5**ENUMERATE****Enumerate the signs of pre-proliferative diabetic retinopathy.**

Q 6**ENUMERATE****Enumerate the indications for laser photocoagulation in diabetic retinopathy.**

Q 7**SCENARIO**

A 60-year-old hypertensive diabetic patient presents with sudden painless loss of vision in his right eye. Fundus examination reveals extensive intraretinal hemorrhages, cotton wool spots, and disc edema. (a) What is the most probable diagnosis? (b) How do you differentiate between the ischemic and non-ischemic types?

Q 8**ENUMERATE****Name causes of cherry-red spot.**

Q 9

SURGICAL PRINCIPLE

What is the surgical principle of treating central retinal artery occlusion (CRAO) and name three emergency measures.

Q 10

DEFINITION

Define retinitis pigmentosa and describe the classic triad of signs.

Q 11

ENUMERATE

Enumerate optic nerve head changes in open-angle glaucoma.

 Chapter 4: أخطاء الانكسار (Errors of Refraction (EOR))

Q 1

DEFINITION

Define myopia, describe its etiological types, and the fundus changes in high myopia.

Q 2

ENUMERATE

Enumerate types of astigmatism.

Q 3

DEFINITION

Define astigmatism and describe its types according to the rule.

Q 4

COMPARISON

Differentiate between simple, compound, and mixed astigmatism with examples.

Q 5**DEFINITION****Define hypermetropia, describe its components and complications.**

Q 6**SURGICAL PRINCIPLE****Give the principle of correction for unilateral aphakia.**

Q 7**CALCULATION****An emmetropic patient at 45 years of age finds it difficult to read at 33 cm. His near point (Punctum Proximum) is 50 cm. Calculate the power of the reading glasses he needs.**

Q 8**SURGICAL PRINCIPLE****Name two suitable corneal refractive surgical options and list three absolute contraindications.**

Q 9

SURGICAL PRINCIPLE

Explain the optical principle of the 'Pinhole test' and what it indicates if vision improves with it.

Chapter 5: الملتهمة (Conjunctiva)

Q 1

DEFINITION

Define conjunctivitis and enumerate its causes.

Q 2

ENUMERATE

Enumerate signs of membranous conjunctivitis.

Q 3

SURGICAL PRINCIPLE

Give the principle of treatment for papillary conjunctivitis.

Q 4

ENUMERATE

Name causes of chronic conjunctivitis.

Q 5

DEFINITION

Define trachoma and enumerate its eyelid and corneal complications.

Q 6

ENUMERATE

Enumerate the clinical types and manifestations of Vernal Kerato-Conjunctivitis (Spring Catarrh).

Q 7

SCENARIO

A 10-year-old boy presents with severe bilateral itching, ropy mucoid discharge, and photophobia. On examination, you see large, flat-topped papillae on the upper tarsal conjunctiva. (a) What is your diagnosis? (b) How do you differentiate these papillae from trachomatous papillae?

Q 8

DEFINITION

Define pannus and describe its clinical types.

Q 9

DEFINITION

Define Ophthalmia Neonatorum and name the causative organisms and their time of onset.

Q 10

SURGICAL PRINCIPLE

What is the surgical principle for treating a recurrent pterygium?

Chapter 6: الحجاج (Orbit)

Q 1

DEFINITION

Define proptosis and enumerate its common causes.

Q 2

DEFINITION

Define orbital cellulitis and enumerate its potential complications.

Q 3

SURGICAL PRINCIPLE

Give the principle of management for orbital cellulitis.

Q 4

SCENARIO

A 38-year-old diabetic lady with known sinusitis develops a sudden, painful, forward protrusion of her right eye with ophthalmoplegia and fever. (a) What is the most likely diagnosis? (b) How do you differentiate it from Preseptal Cellulitis?

Q 5

DEFINITION

Define panophthalmitis and differentiate it from orbital cellulitis.

Q 6

ENUMERATE

Enumerate investigations for unilateral proptosis.

Q 7

SURGICAL PRINCIPLE

Describe the clinical approach and surgical priority in treating thyroid eye disease (TED) orbitopathy.

Q 8

DEFINITION

Define exenteration and enumerate its indications.

Q 9

SCENARIO

A patient presents with pulsating proptosis, a bruit over the eye, and dilated episcleral veins. (a) What is the most probable diagnosis? (b) What is the surgical principle for treating this condition?
